Job Title: Radiologic Technician Senior

Department: Cermak Health Services

Job Summary
Under direct supervision, takes x-ray radiographs of various portions of the body by operating stationary or portable x-ray equipment according to developmental factors and age specifics. Processes and critiques radiographic images, prepares room, equipment, supplies, and medications. Practices infection control and adheres to radiation safety measures.

This position is exempt from Career Service under the CCHHS Personnel Rules.

Typical Duties
- Assesses requisition for appropriateness and change order according to actual exam performed.
- Asks patient to state name and verifies name with ID bracelet and/or requisition.
- Explains the procedure(s).
- Takes radiographs as assigned following prescribed techniques and procedures.
- Prepares and administers to patients contrast agent necessary for the radiography of internal organs.
- Assess and observes patient for adverse reactions during procedures.
- Prepares patient for x-ray, explains procedure, assists and transfers patient to table, position patient’s body or instructs patient how to position body for accurate radiographs and assist patient at the end of procedure.
- Follows prescribed techniques in administering general and specific x-rays, adjust equipment, determine proper voltage, current and desired exposure time, arranges immobilization and support devices to obtain position of patient, adjust lead shield to protect unaffected parts of the body, adjust collimator to direct concentration of rays on specified area and selects proper film.
- Observes patient and machine during procedure and reports unusual occurrences and records patient's condition.
- Sends images to PAC's system. Enters patient information into system.
- Transports patient within the department to/from waiting area.
- Processes film in accordance to guidelines and photographic techniques in PAC's system.
- Performs quality control activities to ensure optimal quality radiographs.
- Performs mobile x-ray in patient's room, pediatric, and adult emergency rooms, trauma unit, and operating room.
- Inspects and monitors emergency trays and informs supervisor in order to notify appropriate nursing personnel whenever emergency equipment has been used for restocking and resealing.
- Assists supervisor in maintaining radiographic technique charts.
- Reports equipment problems to supervisor immediately.
Typical Duties continued
- Prepares and maintains radiological records, files, and technical work sheets.
- Orders and stocks supplies as required.
- Cleans and disinfects x-ray room and equipment after each patient.
- Follows infection control and safety guidelines.
- May be assigned the responsibility of instructing students and auxiliary personnel in radiologic policies and procedures.

Reporting Relationships
Reports to the Medical Division Chairman XII
