REMARKS

David,
As discussed, we are transmitting an updated set of the Sengstacke demolition package with the following modifications based on the 7/24 meeting with the DWM:

- Sheet CD100: Incorporated language describing the sewer televising notes and updated street names.
- Sheets CV100, CD100, and CS100: Incorporated updated street names.

We are not resending the project manual since there were no modifications to that document.

Regards,
Brian
